

THE FACTS ABOUT POTATOES

MESSAGING

Potatoes are more energy packed than any other popular vegetable. Below are USDA-approved messages about the nutrient value in potatoes. All of the messages are study driven with extensive research behind each component.

POTASSIUM

A medium (5.3 oz) skin-on potato contains **620 milligrams of potassium.**

Potassium is an important electrolyte that aids in muscle, cardiovascular and nervous system function.

PROTEIN

A medium (5.3 oz) potato also has **3 grams of protein** in addition to 26 grams of carbohydrate.

As a key component of muscle, protein is an important nutrient for athletic performance.

CARBOHYDRATE

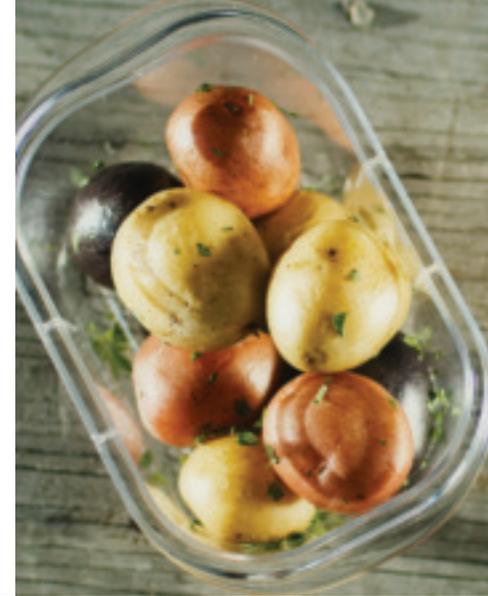

Carbohydrate is the **primary fuel for your brain** and a key source of **energy for muscles.**

Carbohydrate is important for optimal physical and mental performance.

EXTRA VALUE FACTS

- ▶ A medium (5.3 oz) skin-on potato contains 110 calories.
- ▶ Multiple varieties keep meals interesting: russets, reds, yellows, whites, purples, petites, and fingerlings.
- ▶ Several forms to fit various needs: fresh, dehydrated, frozen and refrigerated.
- ▶ Ready to serve in under 30 minutes.
